ABLE

Awareness & Assistance Portal

Awareness • Accessibility • Inclusion

Community Engagement Project

A centralized digital platform for disability awareness, accessible resource discovery, assistance requests and volunteer-driven community support.

Department of Computer Engineering
Modern College of Engineering, Shivajinagar, Pune

1. Problem Statement

The Gap

Essential disability support is available, but it is scattered across schemes, offices, websites, NGOs and local networks. ABLE brings it together in one trusted place.

Information Fragmentation

Government schemes, accessibility data and rehabilitation resources are difficult to locate quickly.

Physical Barriers

PwDs may need verified ramps, entrances, parking and other accessible infrastructure details.

Assistance Gap

On-ground help exists in communities, but there is no simple digital dispatch and volunteer flow.

Need: a community-focused digital platform that connects awareness, verified accessibility information, support resources and participation.

Awareness | Accessibility | Support | Inclusion

2. Proposed Solution

ABLE is designed as a single portal where users can learn, discover resources, request help, report barriers and contribute through volunteering.

Learn

Awareness modules and disability etiquette.

Locate

Accessible facilities and public places.

Request

Assistance flow for community help.

Report

Feedback and barrier reporting.

Core Idea: Technology + verified information + volunteers = inclusive access for daily life.

3. Project Objectives

What the portal aims to achieve

To architect and deploy a centralized digital ecosystem that bridges physical and informational accessibility gaps.

Bridge accessibility gaps

Connect users with reliable information, support resources and community assistance.

Empower independent access

Help users locate schemes, educational material and verified accessible spaces.

Mobilize local volunteers

Enable NSS/student volunteers and community members to respond to assistance needs.

Promote social inclusion

Educate the public and support inclusive participation through awareness campaigns.

ABLE focuses on practical, local and action-oriented community engagement.

4. Target Users

Four user groups

Persons with Disabilities

- Locate verified accessible facilities
- Request on-demand assistance
- Access schemes and resources
- Report local barriers

Families & Caregivers

- Rehabilitation/support networks
- Specialized education resources
- Scheme navigation
- Community assistance programs

Volunteers

- Fulfill assistance requests
- Support awareness drives
- Help users facing barriers
- Contribute local skills

General Public

- Learn disability etiquette
- Understand access needs
- Report issues
- Join inclusion campaigns

5. Website Structure

8 main sections/pages

01

Home

Clear introduction and quick access

02

About Us

Purpose, background and mission

03

Disability Awareness

Information across disability categories

04

Accessibility

Accessible places and facilities

05

Resources & Schemes

Schemes, education and support resources

06

Assistance

Request help from the community

07

Volunteer

Register and contribute

08

Report / Feedback

Report issues and share feedback

Simple navigation ensures every user reaches important services quickly.

6. Key Website Features

Home Page & Navigation

Home | About | Awareness | Accessibility | Resources | Assistance | Volunteer | Report, with a prominent “Get Assistance” action.

Quick Access Cards

Four high-priority actions: Accessibility, Resources, Get Assistance and Become a Volunteer.

Disability Awareness

Simple cards explaining physical, visual, hearing and intellectual disabilities with etiquette guidelines.

Accessibility Around You

Information about ramps, accessible entrances, designated parking and other verified access features.

Assistance Request Flow

Users can request local support, while volunteers can accept and fulfill assistance requests.

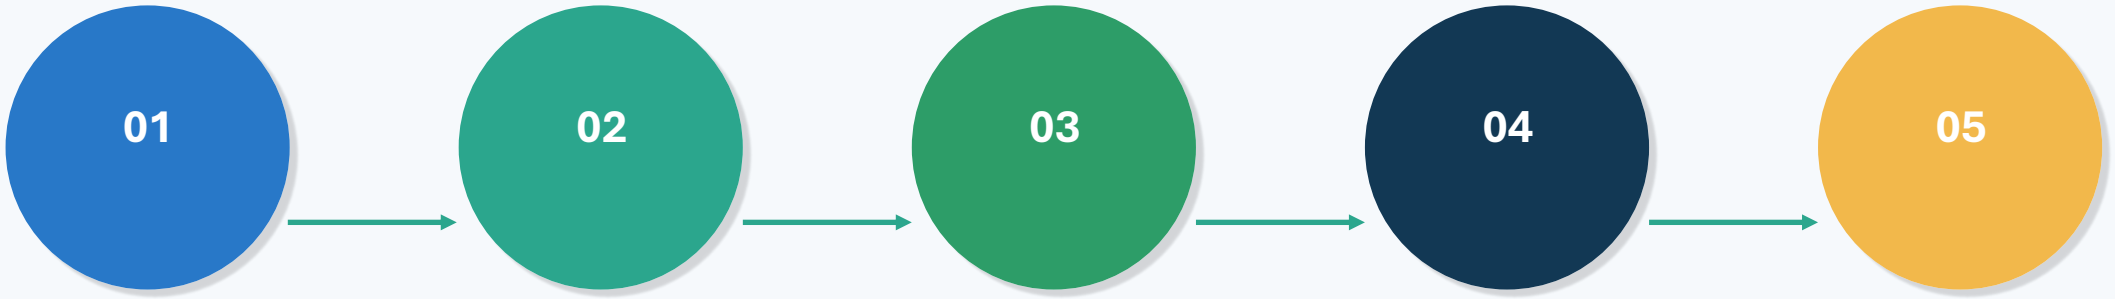

Report & Feedback

Users and the public can report barriers and provide feedback for continuous improvement.

The portal is designed to move users from information → action → community support.

7. User Journey & Workflow

From need to support

User Need

Awareness, resource search, barrier report or assistance request

ABLE Portal

Guides user to the correct module with quick actions

Verification

Admin/volunteer reviews information and request context

Dispatch

Registered volunteers coordinate on-ground support

Impact

Barrier reported, assistance delivered and awareness improved

Every workflow is designed to convert a social accessibility need into a trackable, community-supported action.

8. Technical Infrastructure & Resources

Technical Stack

Open-source Web Technologies

HTML5, CSS3 and JavaScript for development, designed to run on free institutional/open-source hosting.

Data & Field Tools

Official circulars, UDID/DEPwD resources and standardized accessibility survey checklists.

Administrative Clearances

College permission letters for authorised surveys in nearby transit and public spaces.

Budget Approach: lightweight web application + free tools + student volunteer network.

9. Stakeholders & Community Engagement

ABLE is not only a website — it is a coordinated community engagement model linking institutions, verified sources and volunteers.

Partnerships keep content verified. Volunteers convert requests into real-world support.

10. Expected Outcomes & Impact

ABLE helps transform fragmented support into simple, visible and actionable community access.

Reliable accessibility directory

Crowdsourced and verified public infrastructure details reduce physical barriers.

Faster assistance dispatch

Urgent accessibility needs are linked to registered volunteers for on-ground support.

Centralized resources

Schemes, education materials and rehabilitation networks become easier to navigate.

Public inclusion tools

Awareness education and audit tools help society normalize inclusive behavior.

Thank You

ABLE – Awareness & Assistance Portal

Awareness • Accessibility • Inclusion

Mission	**To promote equal opportunities, accessibility and inclusion through information, technology and community participation.**
